SETUP

Tabs

Custom Tabs

Help for this Page

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs

SETUP

New Custom Object

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name Example: Account Name

Data Type

Optional Features

☐ Allow Reports
☐ Allow Activities
☐ Track Field History
☐ Allow in Chatter Groups
☐ Enable Licensing ⓘ

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

☒ Allow Sharing

Salesforce Optimizer

Analyze your implementation to find ways to simplify customizations and drive feature adoption. Consider running Salesforce Optimizer as part of your monthly maintenance, before installing a new app, before each Salesforce release, or at least once a quarter.

Salesforce Optimizer App

The Salesforce Optimizer app analyzes features in an interactive and actionable format.

- Allow access to enable the Salesforce Optimizer app. This step is required to use the app. [Allow Access](#)
- Decide if the app should automatically run and update. ⓘ
